Cadworks Draftsperson

We are currently seeking a passionate, open-minded draftsman to join our experienced and growing team at our award-winning plant in Pemberton, BC. We work on a full range of projects from single and multi-unit residential housing to high-profile commercial buildings, always with a focus on improving construction practice and achieving high goals for energy performance.

Our team promotes great relationships with each other and with clients in a fast developing industry. This is an opportunity to be involved with one of BC's (and Canada's) most advanced construction companies, with innovation at the forefront of our considerations and work-life balance coming in a close second.

Location: Pemberton, British Columbia

Position Type: Full Time

Roles & Responsibilities

- Creating shop drawings for panel systems, timberframe packages and CLT packages using architectural and engineer drawings.
- Work with architect, engineer and project team to develop details, including answering questions with regards to technical information, facilities, timing and the drawing package.
- Work with project team to facilitate ordering, plant scheduling and synchronization between drawings and plant equipment / personnel.

Qualifications & Experience

- Extensive experience with CadWorks/3D modeling software to create shop drawings and models for panel systems and timberframe packages.
- Able to read and quickly conceptualize architectural and engineer drawings.
- Background in wood construction/specifically prefabrication.
- Attention to detail and the ability to problem solve.
- Able to handle timeline pressures and work independently;
- Able to effectively communicate with internal team members and external contacts at various levels, both in writing and verbally.

Application Interested parties, please submit applications to info@bcpassivehouse.com. Only shortlisted candidates will be contacted.
